BASE/SAND GUIDE

| ITEM | CODE |
| :--- | :---: |
| Class 2 Granite Base | $5 \mathrm{MB00}$ |
| Granite Sand | $5 \mathrm{MC10}$ |
| Washed Sand - C33 | $5 \mathrm{MC00}$ |

| ITEM | CODE |
| :---: | :---: |
| 1/4" Chips (for Permeable Pavement) 2,000 lb. Sack | 5CC01 |
| 3/8" Chips (for Permeable Pavement) 2,000 lb. Sack | 5CC02 |
| Granite Sand 2,000 lb. Sack | 5MC01 |

## How to Figure Sand \& Base Needed

1. Convert all measurements to feet:

| $1 "=.0833^{\prime}$ | $2^{\prime \prime}=.1666^{\prime}$ | $3^{\prime \prime}=.25^{\prime}$ | $4^{\prime \prime}=.3333^{\prime}$ | $5^{\prime \prime}=.4166^{\prime}$ | $6 "=.50^{\prime}$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $7 "=.5833^{\prime}$ | $8^{\prime \prime}=.6666^{\prime}$ | $9^{\prime \prime}=.75^{\prime}$ | $10 "=.8333^{\prime}$ | $11^{\prime \prime}=.9166^{\prime}$ | $12^{\prime \prime}=1^{\prime}$ |

2. Length $x$ Width $x$ Depth $=$ Cubic Feet 3. Cubic feet divided by 27 = Cubic Yards needed for project.

EXAMPLE Base and sand for a 20' x 20' area with a $6^{\prime \prime}$ base and 1 " of sand cushion is as follows: 6 " Base: $20 \times 20 \times .50=200$ cubic feet / 200 divided by $27=7.40$ yards base material needed. 1 " Sand: $20 \times 20 \times .0833=33.33$ cubic feet $/ 33.33$ divided by $27=1.23$ yards of sand needed.
