

PERMEABLE INTERLOCKING CONCRETE PAVEMENT

PRESENTATION OBJECTIVES

- Overview Permeable Paver Systems
- Construction Materials / Practices
- Stormwater Management Solutions
- Design Considerations
- Maintenance
- Application Advantages

THE BENEFITS OF OUR PERMEABLE SYSTEM

- Create a healthier eco-system by managing stormwater with Permeable Interlocking Concrete Pavement (PICP)
- Mitigation of 1st flush pollutants
- Efficient land use
- Decrease the need for detention ponds minimizing compromised waters and liabilities
- 100% infiltration
- Class A aggregates – best performance
- PICP can be easily and inexpensively cleaned using street sweepers and refilling joints – no need to remove product
